

The ADS Promise

Our promise is simple, yet powerful:

"We promise to provide an honest assessment of your security risks, whether they are minor or complex, and to deliver a solution that effectively addresses them using the best equipment at the most competitive prices. We also promise to support you and your staff once our system is implemented, whenever the need arises."

What's protecting your restaurant's assets?

We'll help you keep them safe.
*Digital Video Surveillance Solutions
for Restaurants*

Affordable, High-Resolution CCTV Systems

Is your restaurant at risk?

Restaurants are particularly vulnerable to robberies, burglaries and theft. Internal theft can be particularly problematic as employees often have easy access to cash, credit cards and inventory and can be keenly aware of the restaurant's operational and security weaknesses. Theft can also be performed in other ways, such as giving away free food to family and friends or manipulating guest checks.

Through the use of high-resolution cameras and digital video recorders, restaurant personnel can easily view clear, crisp color images of all monitored areas using any Internet connection.

Video surveillance systems give restaurant management and law enforcement personnel the eyes they need to effectively protect property, assets and guests.

Video Surveillance Benefits:

- Provides an effective, budget-friendly method to improve restaurant security and monitor safes, bank deposits, cash registers, consumer credit cards, food, beverage and equipment inventory and more.
- Supplies irrefutable, clear visual evidence in the event of a security breach or incident.
- Assists with employee behavior modification and proactively works to prevent problems.
- Decreases theft and property losses, resulting in lower insurance premiums.
- Delivers high return on investment and increased profitability.

Watch it all with ADS

Key Restaurant Monitoring Areas:

- ⇒ Inventory storage
- ⇒ Cash registers
- ⇒ Petty cash

- Installation, service and support

ADS: The Quality Choice

Advanced Digital Security, Inc. (ADS) has been designing, implementing and servicing digital video surveillance systems for almost two decades. ADS offers the best security expertise, featuring over 100 years of combined experience.

Our Difference:

➤ State-of-the-Art Equipment

Our systems feature the finest components from top manufacturers. To maximize quality and customization, we build our own DVRs using Pentium 4 processors and brand-name components from companies such as Western Digital.

➤ Technology

ADS utilizes the most dependable platforms to ensure that your system is consistently reliable. While ADS systems usually operate on Windows XP®, we are also experienced in working with other platforms.

➤ Experienced, Dedicated Staff

Unlike many other companies, ADS service and installation staff are background-checked company employees. To maintain the highest integrity, we never use outside contractors or third parties.

➤ Competitive Pricing

Our experience, national buying power and strategic alliances with key manufacturers empower us to offer you the best prices in the industry. We won't be undersold.

➤ Training

ADS is committed to teaching your staff how to make the most of your video surveillance system. We'll train your employees, ensuring they know how to properly utilize the equipment and get the most from all features.

➤ Service and Support

Our commitment to your organization doesn't end when your installation is complete. We proactively remain in contact with you and are readily available should you ever need assistance.
